SUMMARY

Computer Programming Student at Technological University of the Philippines in Manila with 2 years of experience in building full stack web applications, webhooks and AI-powered systems.

PROJECTS

HealthSync Clinic Management System **SEPTEMBER 2025**
• Build a web-based clinic management system, simplifying the school nurse's workflow through digital records, real time communication tools and streamlined healthcare processes.

Digital Father's Day **JUNE 2026**
• Created an Interactive tap-to-open envelope, revealing a scripture-rooted tribute to the congregations pastors with personalized letters scroll triggered reveals and a closing message of gratitude.

JULIA AI **SEPTEMBER 2026**
• A Hello Kitty-themed AI that chats naturally, generate images from your ideas, reads photos, files and shared links and formats answers clearly from step by step list to tables.

RESUME ANALYZER **SEPTEMBER 2026**
• A web-based resume review system built with Node.js and Tailwind CSS featuring PDF and DOCX upload, rule-based ATS checks, AI-generated feedback, keyword matching against job postings, and section-by-section improvement suggestions for job seekers.

Learn & Approach **OCTOBER 2026**
• An Interactive matching game designed to sharpen attention to detail, each of the four levels offers three shuffled choices with only one correct match and the final results connects players to the activity questions in Google drive.
